Southwest Utah Public Health Department (SWUPHD)

260 DL Sargent Drive

Cedar City, UT 84721

To Whom It May Concern,

It has come to my attention that Hills and Hollows intends to add a permanent food truck to the existing septic system on the property. No record of this septic system or its permit can be found within the SWUPHD. Without this, the size of the system cannot be accurately determined nor can it be determined whether or not it can handle the extra wastewater load that would come from installing this food truck.

Given that other renters have used the kitchen area inside of Hills and Hollows for baking without overloading the septic system, it may be inferred that the food truck will also not overload the system. That being the case, Hills and Hollows has my permission to add the food truck to their system on the basis that the SWUPHD will bear no responsibility if the system fails in the future due to the extra use. The original system on the Hills and Hollows property does not appear to have been permitted by the SWUPHD and so will bear no responsibility for its use.

Cordially,

Mitchell Christensen
