Boulder Town Mayor And Council

Regards: Fire Hydrant Issues/ Hydrant Agreement

The water company would like to address the past , recent and continued verbal attack against and towards the company and their employees. There is clearly a misunderstanding the role the water company and the town and its citizens and shareholders.

The water company is owned by its shareholders and operated by the Board of Directors under the directions of the shareholders. The water company provides water to its shareholders and also supplies water to fire hydrant for shareholders and non shareholders fire protection .

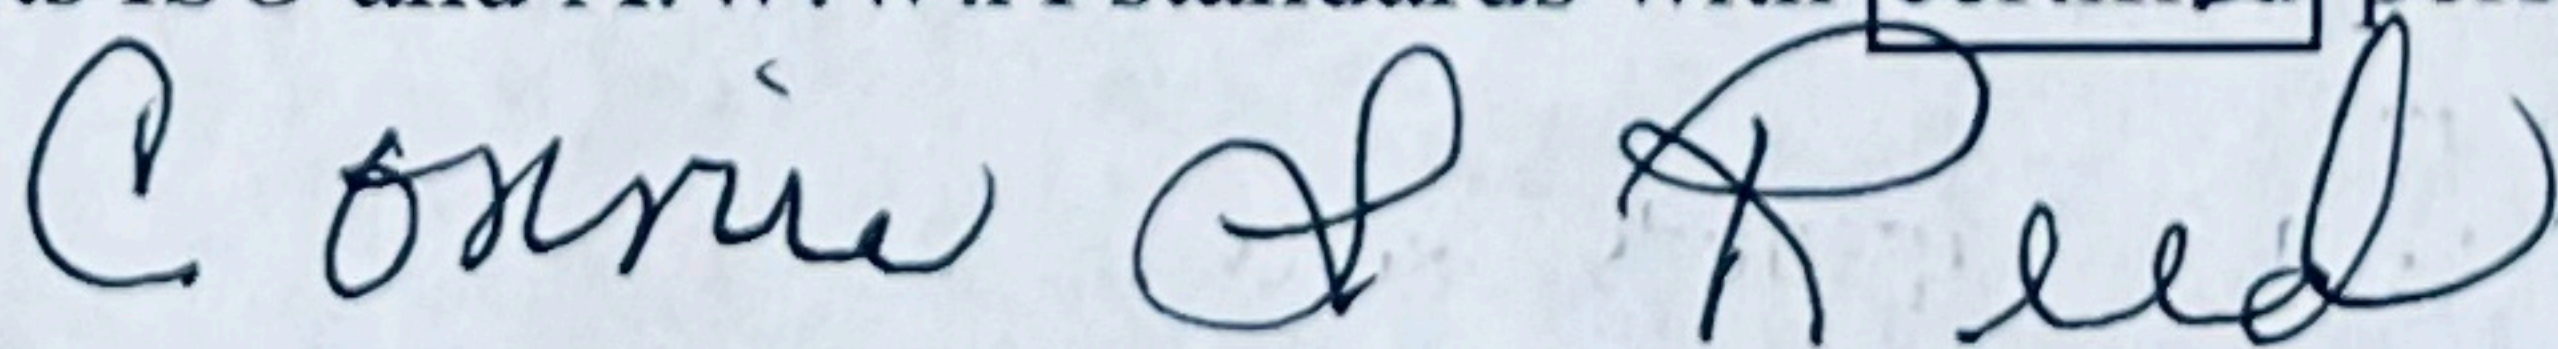

The first agreement for fire protection was in 1984 with the town and the water company in which it states that the town is responsible for the maintenance of the fire hydrants in the system. After years of this agreement we both agreed that was beneficial to start a new agreement

Under section 4.3 of the current agreement its states that the water company has no responsibility to install additional fire hydrants or enlarge lines or make other alterations to assist the Town in furnishing fire protection to residents. The funds received for this is minimal cost to save lives and have fire protection in which goes directly to the company for operating expense and the not directly to employees .

The continued verbal attack against the water company as being a monopoly company coming from letter and comments by {Quote} Assistant to the Boulder Fire Chief comment's made by Dan Pence and other non-shareholders toward the water company is clearly not acceptable.

Clearly you have an internal problem with some of your volunteers stating there personal opinion and signing for the Boulder Town this clearly needs to be addressed.

So as to help clear up any considered conflict with the Town and its citizens and any other misinformed individual the water company will not renew the current agreement with the Town. According to section Termination of Agreement section 2.2 of this agreement the Town agrees to supply Water Company acceptable plans for the hydrant maintenance and testing that meets ISO and A.W.W.A standards with certified personal.

Sincerely

Boulder Farmstead Water Company
