

Committee Work on Road Standards

- 1) Town consensus on goals: public safety, appearance,
- 2) Start with engineering standards documents from similar rural jurisdictions. (Note Most standards are extremely comprehensive and detailed because they deal with major roads and infrastructure that we do not have here. They cannot be simply adopted as is if we want to preserve the character of Boulder.)
- 3) Extract Boulder-appropriate elements.
- 4) Organize in a “Boulder Town Engineering Standards” document.
- 5) Send to Town Council to be adopted by reference.
