ESTABLISHMENT OF ZONING DISTRICTS

§ 153.115 ZONING BY DISTRICTS.

- (A) In accordance with the requirement of the Utah Code that zoning within municipalities be by districts, the town, as shown on the town zoning districts map, is divided into zoning districts that govern the use, intensity and other requirements for the use of land. The map accompanying this chapter, the town zoning districts map (zoning map), and incorporated herein by reference, identifies the location and distribution of each zoning district provided by the town. All development, use, activity and permits and licenses shall conform to all the provisions, standards and requirements of the applicable zoning district.
 - (B) To meet the purposes of this chapter, the following zoning districts are provided:
 - (1) Greenbelt Multiple Use District (GMU);
 - (2) Low Density Residential District (LDR);
 - (3) Medium Density Residential District (MDR);
 - (4) High Density Residential District (HDR); and
 - (5) Commercial District (C).

(Ord. 46, passed 8-28-2001; Ord. 21D, passed 1-7-2004; Ord. 59, passed 5-8-2008, § 601)

§ 153,116 ZONING DISTRICTS PURPOSE.

The zoning districts are formulated to provide and achieve the following purposes.

- (A) Greenbelt Multiple Use District (GMU). The Greenbelt Multiple Use District (GMU) is established to provide areas for agricultural activities and to allow other uses determined to be compatible with agricultural uses and activities.
- (B) Low Density Residential District (LDR). This district provides for a single-family large lot, low-density residential living environment with a density of one dwelling unit for each five acres and other uses that do not require additional public facilities and services than those provided to a low-density residential area. Additionally, this district is established to allow limited development on areas that may possess certain constraints for development.
- (C) Medium Density Residential District (MDR). The Medium Density Residential (MDR) District, providing a maximum density of one dwelling unit per two and half acres, is provided by the town to allow an alternative residential living environment than those provided by the LDR and HDR Districts.
- (D) High Density Residential District (HDR). The High Density Residential District (HDR) provides higher density residential areas and allows a variety of other uses and services to meet the needs of residents of the town.
- (E) Commercial District (C). The town provides the Commercial (C) District to allow a variety of retail commercial, office and light industrial activities within the town to meet the needs of residents and visitors, to provide employment opportunities for residents, and to strengthen and provide diversity to the local economy. As explained in 7.5 of the 2021 amendments to Boulder's General Plan, this Commercial District is no longer in use. It is retained only to provide a regulatory framework for those uses that were approved within it.

(Ord. 46, passed 8-28-2001; Ord. 21D, passed 1-7-2004; Ord. 59, passed 5-8-2008, § 602; Ord. 2021-2, passed - -2021)

§ 153.117 TABLE OF USES.

- (A) The Table of Uses (Table 1) identifies the uses allowed within each Zoning District. The Table of Uses identifies uses allowed as a permitted use (identified as "P" in the table), for which only administrative permits are required; uses allowed upon approval of a conditional use permit (identified as "PC, Potentially Compatible"); and uses allowed as a temporary use (identified as "T"). Definitions for various uses may be found in § 153.011.
- (B) All uses not specifically identified as permitted, potentially compatible (permitted with a conditional use permit), or temporary within a zoning district are prohibited there, as are all uses that are not specifically identified or listed in Table 1. Cells that are left blank in the Table of Uses indicate the use is prohibited in the particular zoning district, though the use may be allowed in other zoning districts.

§ 153.205 WIRELESS COMMUNICATION TOWERS AND FACILITIES.

- (A) Requirements for facility permit submissions.
- (1) A conditional use permit is required. In addition to any other materials required for a standard permit under this section or any other town ordinances, all applicants for permits to construct a telecommunications tower or antenna shall submit visual impact demonstrations using photo simulations of the proposed facility as it would be seen from residential areas, public rights of way, and public parks and other sites as deemed appropriate by the Planning Department.
- (2) Weight may be given in favor of the application if the applicant is able to demonstrate a net benefit to the community and its residents for increased cell service and/or other desirable communications capacities and capabilities.
- (B) Location of facilities at or near the center of town, on mesa tops, or highly visible from scenic corridors such as State Highway 12. Towers and antennae may be approved at or near the center of town, on mesa tops, and in designated scenic corridors by special exception and if possible concealed so as to be substantially invisible. The views of, and vistas from,

such areas and corridors shall not be impaired or diminished by the placement of telecommunications towers and antennae.

- (C) Height restrictions.
- (1) No new telecommunications facility shall exceed 50 feet in height over ground level directly below. Due to the wide variation in topographical features and remote locations sited away from town center, residential areas, and State Highway 12, the Planning Commission has broad discretion in requiring the applicant to seek out locations and exhaust all reasonable options for siting the tower in the least impactful locations.
- (2) Telecommunications facilities that simulate objects that typically occur in landscapes similar to the proposed location (except billboards, electrical transmission, or telecommunications towers) may exceed 50 feet in height if, based on the judgment of the Planning Commission or body issuing the conditional use permit, it would appear in context on the landscape, is aesthetically acceptable, and would be a preferable alternative to an undisguised facility.
- (3) Telecommunications facilities located atop or within existing buildings or structures may result in an overall increase in height of the structure of no more than 10% of the structure's height without the facility or the maximum height allowed in the zoning district in which the structure is located, whichever is less.
 - (D) Co-location.
- (1) In all applications for construction of a new facility, the applicant must prove by substantial evidence that a bona fide need exists for the facility and that no reasonable combination of locations, techniques, or technologies will obviate the need. The applicant must further prove that it has made all reasonable efforts to procure antenna space on existing facilities and that the cost of co-location exceeds the cost of a new facility by at least 50%.
- (2) Prior to the issuance of a permit for a new tower, the applicant shall demonstrate commitment to joint use as follows:
- (a) The applicant requesting the permit shall submit evidence to the town demonstrating that a genuine effort has been made to solicit additional users for the proposed new tower. Evidence of this shall include, at a minimum, copies of notices sent by registered mail, return receipt requested, to all other providers of cellular and wireless communications services within Garfield County and adjacent counties, advising of the intent to construct a new tower, identifying the location, inviting the joint use and sharing of costs, and requesting a written response within 15 business days.
- (b) The applicant shall sign an instrument, maintained by the town, agreeing to encourage and promote the joint use of telecommunications towers within the town and, to that extent, committing that there shall be no unreasonable act or omission that would have the effect of excluding, obstructing or delaying joint use of any tower where fair and just market reasonable compensation is offered for such use.
- (E) Setback. No new tower shall be constructed without a setback from the tower's base of at least one and one-half times the tower height to a public or private road and at least two and one-half times the tower height to the nearest property line.
- (F) Equipment shelters. No equipment shed for a telecommunications facility shall exceed 750 square feet in area nor 12 feet in height. All such sheds shall be screened with vegetation or other aesthetically pleasing materials. Furthermore, all such sheds shall be secured with approved fencing and a locked gate if deemed necessary by the Planning Commission.
- (G) Signs, lighting and noise. No commercial messages nor any other signs beyond safety warnings and an identification sign of not greater than four square feet shall be placed on any tower or facility, nor placed higher than five feet above ground level. No lighting, or devices emitting noise, shall be placed or maintained on the tower or facility in a manner visible or audible offsite.
 - (H) Electronic emissions and electromagnetic radiation.
- (1) Prior to commencing regular operation of the facility, all facility owners and operators must submit a certificate of compliance with all current Federal Communications Commission regulations concerning electromagnetic radiation and other electronic emissions applicable to the facility.
- (2) All facility operators and owners must sign an agreement, to be maintained by the town, agreeing to bring facilities into compliance with any new federal, state, or local laws or regulations concerning electromagnetic radiation and other electronic emissions applicable to the facility within 120 days of the effective date of the regulations.
- (I) Removal of facilities. The owner of a facility shall establish a \$10,000 cash security fund or provide the town with an irrevocable letter of credit in the same amount to secure the cost of removing an antenna, antenna array, or tower that has been abandoned. In the event of a transfer of ownership, the seller shall be responsible for notifying the buyer of this requirement and for notifying the town of the transfer.

- (2) Any person adversely affected by a final decision made in the exercise of, or in violation of, the provisions of this chapter may file an appeal petition for review of the decision with the District Court within 30 calendar days after the decision is final.
 - (3) An appeal petition is barred unless it is filed within 30 calendar days after the appeal authority's decision is final.
 - (B) Tolling of time.
- (1) The required time for filing for District Court review shall be tolled from the date that a person files a request for arbitration of a constitutional taking issue with the property rights ombudsman, as provided by UCA § 63-34-13, as amended, until 30 calendar days after:
 - (a) The arbitrator issues a final award; or
- (b) The property rights ombudsman issues a written statement under UCA § 63-34-13(4)(b), as amended, declining to arbitrate or to appoint an arbitrator.
- (2) A tolling under this section operates only as to the specific constitutional taking issue that is the subject of the request for arbitration filed with the property rights ombudsman by a property owner.
- (3) A request for arbitration filed with the property rights ombudsman after the time under division (B)(1) above to file an appeal petition has expired does not affect the time to file an appeal petition.
 - (C) Standards governing court review.
 - (1) The District Court shall:
- (a) Presume that a decision, ordinance or regulation made under the authority of this chapter, or the town's other land use ordinances, and the Act, is valid; and
 - (b) Determine only whether the decision, ordinance or regulation is arbitrary, capricious or illegal.

- (2) A decision, ordinance or regulation of the Council involving the exercise of legislative discretion is valid if the decision, ordinance or regulation is reasonably debatable and not illegal.
- (3) A decision of a land use authority or an appeal authority involving the exercise of administrative discretion is valid if the decision is supported by substantial evidence in the record and is not arbitrary, capricious or illegal.
- (4) A determination of illegality requires a determination that the decision, ordinance or regulation violates a law, statute or ordinance in effect at the time the decision was made or the ordinance or regulation adopted.
- (5) The time requirements for the filing of an appeal petition with District Court, as provided by this chapter apply from the date on which the land use authority takes final action on a land use application for any adversely affected third party, if the land use authority conformed with the notice provisions of this chapter, as applicable, or for any person who had actual notice of the pending decision.
- (6) If the town has complied with the notice requirements, as provided by this chapter, a challenge to the enactment of this chapter may not be filed with the District Court more than 30 calendar days after the enactment.
 - (D) Appeal authority; review on the record.
- (1) The Council, acting as a land use authority, or appeal authority, as the case may be, shall transmit to District Court the record of its proceedings, including its minutes, findings, orders and, if available, a true and correct transcript of its proceedings.
- (a) If the proceeding was tape-recorded, a transcript of that tape recording is a true and correct transcript for purposes of this section.
- (b) If there is a record, the District Court's review is limited to the record provided by the land use authority, or appeal authority, as the case may be.
- (2) The court may not accept or consider any evidence outside the record of the land use authority or appeal authority, as the case may be, unless that evidence was offered to the land use authority or appeal authority, respectively, and the court determines that it was improperly excluded.
 - (3) If there is no record, the court may call witnesses and take evidence.
 - (4) The filing of a petition does not stay the decision of the land use authority, or appeal authority, as the case may be.
 - (E) Staying of decision.
- (1) Before filing a petition under this chapter, or a request for mediation or arbitration of a constitutional taking issue under UCA § 63-34-13, as amended, the aggrieved party may petition the appeal authority to stay its decision.
- (2) Upon receipt of a petition to stay, the appeal authority may order its decision stayed pending District Court review if the appeal authority finds it to be in the best interest of the town.
- (3) After a petition is filed under this chapter, or a request for mediation or arbitration of a constitutional taking issue is filed under UCA § 63-34-13, as amended, the petitioner may seek an injunction staying the appeal authority's decision.

HOME BUSINESSES

§ 153.400 HOME BUSINESSES.

This subchapter provides detailed standards for the review of proposed home businesses. The Planning Commission shall approve any application for a CUP for a proposed home business that complies with the standards of this subchapter and other requirements of this chapter. Compliance means that the proposal meets all absolute standards of this subchapter and has a cumulative score of zero or better on the relative standards. Compliance review will be conducted using the checklist that is located in § 153.401.

- (A) Must the owner of a home business be in residence? Yes. The proposed home business must be owned and operated by a current resident of the dwelling in which it is proposed. The right to continue the home business ends if its owner is no longer in residence.
- (B) Must home businesses comply with the dimensional requirements of §153.119? At a minimum, yes, but the Planning Commission may reject an application for a CUP for a home business where it finds that the existing setbacks are not deep enough to mitigate potential impacts of the proposed home business.
- (C) How much indoor space can be used for a home business? That depends on its location. The indoor space that can be used for a home business is limited as follows:
 - (1) A maximum of one thousand five hundred (1,500) square feet will be permitted in the C and GMU zoning districts.
 - (2) A maximum of seven hundred fifty (750) square feet will be permitted in the residential zoning districts.

Applicants must demonstrate compliance with this standard by submitting a scaled floor plan of the dwelling or accessory structure that clearly delineates the area that will be used for the home business.

- (D) Can a home business have outdoor workspace or store materials outdoors? Possibly. Proposed outdoor workspaces and/or the outdoor storage of materials, supplies, equipment, vehicles, or goods for sale associated with a home business will be evaluated using the following standards.
- (1) They must fall within the setbacks required by §153.119 of this chapter, but the Planning Commission may condition approval of outdoor workspaces or storage associated with a home business on the provision of setbacks deeper than those established by § 153.119 if it finds that a greater distance from property lines or public ways is necessary to mitigate the potential impacts of the proposed home business.
- (2) The effective buffering or screening of outdoor workspaces or storage associated with home businesses is encouraged. Compliance with this relative standard will be determined by the Planning Commission using the scoring range and weights adopted on the home business checklist.

Applicants must demonstrate compliance with this standard by submitting a scaled site plan that clearly delineates any outdoor space that would be used for the proposed home business. This drawing must show the required setbacks and any proposed buffers or screening. Where it is proposed to use existing vegetation as a buffer, photographs of that existing vegetation must be submitted. Where the buffer or screening will be installed, a planting plan and/or screening design must be submitted.

- (E) Are there restrictions on parking or traffic generation by home businesses? Potentially. Home businesses that are reasonably expected to generate parking or traffic congestion along town roads or that have the potential to obstruct access to other properties are discouraged. The potential for congestion will be determined by the Planning Commission using the scoring range and weight adopted on the home business checklist. Among other things, the Planning Commission may consider parking and traffic generated by deliveries, the possibility that the proposed home business will offer classes or stage events, and whether the home is within the Sensitive Lands, Hillside, and Mesa Tops Overlay Protection District where access to a home business may be restricted by the terrain.
 - (F) Must a home business provide parking? Potentially.
 - (1) Off-street parking must be provided as required by §153.120 of this chapter. Note: this rate may be zero.
- (2) Where more than one additional off-street parking space is provided, effective buffering or screening of that off-street parking is encouraged. Compliance with this relative standard will be determined by the Planning Commission using the scoring range and weights adopted on the home business checklist.
 - (G) Are there restrictions on potential nuisances generated by home businesses? Yes.
 - (1) No home business shall require an NPDES permit, as required by state law.
 - (2) No home business shall require an air quality permit, as required by state law.
- (3) The storage, use, and disposal of hazardous materials by home businesses shall be permitted only to the extent allowed for residential occupancies by NFPA 1, the 2006 Uniform Fire Code.
 - (4) No home business shall result in additional outdoor lighting.
 - (5) No home business shall result in blowing dust or smoke that adversely affects adjoining properties or public ways.
- (6) No home business shall result in radiant heat or glare from welding equipment or other sources of intense heat or light that adversely affect adjoining properties.
 - (7) No home business shall generate sound that adversely affects adjoining properties.
- (H) Must a home business make proper provision for solid waste storage and disposal? Of course. All applications for CUPs for home businesses shall show how any solid waste generated by the proposed home business will be properly stored and disposed of. The Planning Commission may reject an application for a CUP for a home business upon finding that it will generate a type and/or quantity of solid waste that is not compatible with neighboring residences.
- (I) Can a home business have a sign? Yes. Home businesses may display a single sign of no more than four (4) square feet in size. This may be a freestanding, hanging, projecting, or wall sign. The application for a permit to establish a home business must be accompanied by scaled drawings that show the placement of the sign on the property and/or structure and the dimensions of the sign.
 - (J) Can vehicles associated with a home business be parked on residential premises?
- (1) Only vehicles of ten thousand (10,000) pounds gross vehicle weight or less can be parked overnight in residential zoning districts. Overnight parking of a larger vehicle is not a permitted part of a home business.
- (2) Where the home business involves the service or repair of vehicles, no more than two (2) vehicles waiting for or undergoing service or repair may be on the premises at any time.
- (K) Can the operating hours of home businesses be restricted? Yes. The Planning Commission may condition the approval of a home business on limited operating hours.
- (L) How will compliance with these standards be ensured? A certificate of occupancy is required for all home businesses. No such certificate shall be issued until all site improvements (landscaping, screening, parking, etc.) required for compliance

with any of the standards adopted here are in place. A CUP for a home business is subject to revocation, as provided in Chapter 8 of this Ordinance.

COMMERCIAL DEVELOPMENT STANDARDS

§ 153.415 COMMERCIAL DEVELOPMENT STANDARDS.

This chapter provides detailed standards with which potentially compatible commercial uses must comply to receive a conditional use permit (CUP). The Planning Commission shall approve any application for a CUP that complies with these standards. Compliance means that the proposal meets all absolute standards of this chapter and has a cumulative score of zero or better on the relative standards. Compliance with the relative standards adopted here will be determined by the Planning Commission using the scoring range and weights adopted on the commercial use checklist that is located in § 153.416.

- (A) Are there locational constraints on commercial development in Boulder? Yes. Commercial development is confined to parcels from which there is direct access to Utah Highway 12.
 - (B) Are there environmental constraints on commercial development in Boulder? Yes.
- (1) There shall be no commercial development on sensitive lands, as defined in §§153.185 et seq., or within the Sensitive Lands, Hillside, and Mesa Tops Overlay District established by §§ 153.235 et seq.
- (2) Commercial development must provide a vegetated buffer along all watercourses, permanent and intermittent, including irrigation works and wetlands. Where feasible, the buffer along a watercourse shall include the entire riparian or wetland area and an additional upland buffer of at least twenty five feet (25'). Where the Planning Commission finds that it is not feasible to include the entire riparian or wetland area, the minimum buffer along a watercourse or around a wetland, shall be fifty feet (50'). The minimum buffer along an irrigation ditch shall be determined in consultation with the owner of the ditch. Irrigation works may, with permission of the owner, be moved underground.
 - (3) Commercial development is encouraged to avoid slopes of fifteen percent (15%) to thirty percent (30%).
- (4) An exception may be made to allow utilities and pedestrian trails, or, where the Planning Commission finds that no other vehicular access is feasible, an access drive to cross watercourses and their buffers or moderate slopes. Where a crossing is permitted, it shall take the shortest feasible route and disturb the minimum area necessary for its safe functioning.
- (5) The siting and design of commercial buildings and outdoor spaces is encouraged to preserve views and make use of the site's natural and cultural features.
- (C) Must existing vegetation be retained during construction and occupancy of a commercial development? In some cases.
- (1) The removal of existing perennial vegetation, particularly trees, that provides buffering, shade, and/or other functions is discouraged.
- (2) All vegetation preserved in compliance with these standards shall be protected during construction, including clearly marking the permitted limits of grading and, where necessary, the installation of tree wells or other barriers.
 - (D) Must commercial development manage its storm water runoff? Yes.
 - (1) All development must comply with Utah's Storm Water Management Program.
- (2) The Town prefers that runoff be absorbed as near its point of origin as possible. Curb and gutter will not ordinarily be permitted, but the Planning Commission may approve an exception where the use of curb and gutter clearly results in more effective storm water management.
 - (E) Must commercial development provide utilities and access in accord with Town standards? Yes.
 - (1) Utilities must be provided as required by §§ 153.185 et seq. and Utah law.
 - (2) UDOT approval is required for access to Highway 12.
 - (3) Points of access (driveways) to town or county roads shall have a minimum width of twenty two feet (22') and meet

all applicable state and county standards.

- (4) Undergrounding of utilities is encouraged.
- (F) Must commercial development comply with the dimensional requirements of §153.119? At a minimum, yes. The Planning Commission may, however, condition approval of a commercial use on the provision of setbacks deeper than those established by § 153.119 where it finds that a greater distance from property lines or public ways is necessary to mitigate potential impacts of the proposed commercial use.
 - (G) Is the scale of proposed commercial uses directly limited? Yes.
- (1) Commercial uses for which more than fifteen (15) total parking spaces would be required by §153.120 are prohibited in the LDR.
- (2) Commercial uses for which more fifty (50) total parking spaces would be required by §153.120 are prohibited in the GMU.
- (3) Where there is a dwelling on a parcel that has a commercial use, the parking associated with that dwelling may be in addition to what is permitted for the commercial use.
- (4) Land use intensity as measured by the floor area ratio and lot coverage is encouraged to be compatible with that on neighboring properties.
- (H) Can a commercial use have outdoor workspace or store materials outdoors? Potentially. Outdoor workspaces and the outdoor storage of materials, supplies, equipment, vehicles, or will be evaluated using the following standards.
- (1) At a minimum, outdoor workspace and storage must fall within the setbacks required by §153.119. Deeper setbacks may be required for compliance with division (F), above.
- (2) The effective buffering or screening of outdoor workspaces or storage is encouraged. The lack of irrigation water to support effective landscaping is a valid reason for a finding that a proposed commercial use fails to comply with this standard.
 - (3) Outdoor workspaces and/or storage must not occupy required parking spaces.
- (I) Can a commercial use have outdoor sales space? Potentially. Outdoor sales spaces will be evaluated using the following standards.
- (1) Outdoor sales areas must fall within the setbacks required by §153.119. Deeper setbacks may be required for compliance with division (F), above.
- (2) Outdoor sales areas may not occupy more than ten percent (10%) of the parcel's street frontage up to a maximum of forty feet (40').
- (3) The landscaping of outdoor sales spaces is encouraged. The lack of irrigation water to support effective landscaping is a valid reason for a finding that a proposed commercial use fails to comply with this standard.
 - (4) Outdoor sales must not occupy required parking spaces.
 - (J) Are there limits on parking or traffic generation for commercial development? Potentially.
- (1) Commercial uses that are reasonably expected to generate parking or traffic congestion along town roads or Highway 12, or that have the potential to obstruct access to other properties are discouraged prohibited. The potential for congestion will be determined by the Planning Commission using the scoring range and weight adopted on the commercial use checklist. Among other things, In making a finding that there will be parking or traffic congestion, the Planning Commission may consider parking and traffic generated by deliveries and the possibility that the proposed commercial use will offer classes or stage events. The Commission may table consideration of an application pending completion, at the applicant's expense, of a traffic study by qualified professionals.
- (2) Approval of a CUP may be conditioned on the installation of improvements that will fully mitigate reasonably expected congestion. Such improvements shall be made at the developer's expense.
 - (K) Must a commercial use provide off-street parking? Yes, as required by the following standards.
 - (1) Off-street parking must be provided at the rate set by §153.120.
- (2) Excessive off-street parking is prohibited. This means that a use may provide no more than four parking spaces more than the minimum set by § 153.120.
- (3) Uses that are intended or reasonably expected to serve the traveling public, specifically including, but not limited to, lodging and restaurants, must provide at least one off-street parking space that is suitable for recreational vehicles plus one additional recreational vehicle parking space for every ten (10) spaces that use is required to provide. No additional recreational vehicle parking space must be provided where fewer than ten (10) spaces are required.
 - (4) Off-street parking is not permitted within the front setbacks established by §153.119.
- (5) Off-street parking is discouraged from occupying more than sixty percent (60%) of the frontage of a commercial development (for corner lots, the frontage along the busiest street).

- (6) Effective buffering or screening of off-street parking areas is encouraged.
- (7) Provision of internal landscaping within off-street parking areas that include ten (10) or more spaces is encouraged.
- (L) Are commercial uses encouraged to moderate their visual impact, as seen from the road? They are. The long axis of commercial buildings is encouraged to be perpendicular rather than parallel to the road (for buildings on a corner lot, perpendicular to the busiest road). See also division (T)(3).
 - (M) Must commercial uses make proper provision for solid waste storage and disposal? Of course.
- (1) All applications for CUPs for commercial uses shall show how any solid waste generated will be properly stored and disposed of. The Planning Commission may reject an application for a CUP for a commercial use upon finding that the proposed provisions for solid waste storage and disposal are inadequate.
- (2) Proper storage includes ensuring that solid waste is not accessible to animals and that blowing waste will not become a nuisance.
 - (N) Are there restrictions on potential nuisances generated by commercial uses? Yes.
 - (1) No commercial use shall require an UPDES permit that is required by state law.
- (2) No commercial use shall channel surface run-off onto another property, into irrigation works or a storm water treatment pond, or onto a public way except in compliance with an approved storm water management plan and with permission of the property owner(s).
 - (3) No commercial use shall require an air quality permit this is required by state law.
- (4) Commercial storage, processing, use, and disposal of hazardous materials is not permitted. It is recognized, however, that some compatible commercial uses may use small quantities of hazardous materials (paint, solvents, and the like). The use of hazardous materials is permitted only to the extent allowed by and in compliance with NFPA 1, the 2006 Uniform Fire Code.
 - (5) All outdoor lighting fixtures shall bear the International Dark Sky Association Fixture Seal of Approval.
 - (6) No commercial use shall aim or direct light onto another property or public way.
- (7) No commercial use shall result in blowing dust or smoke that adversely affects adjoining properties or the use of public ways.
- (8) No commercial use shall result in radiant heat or glare from welding equipment or other sources of intense heat or light that adversely affect adjoining properties or the use of public ways.
 - (9) No commercial use shall generate sound that adversely affects adjoining properties.
 - (10) Compliance with the Utah Noxious Weeds Act, Utah Code, Title 4, Chapter 17, is required.
 - (O) Must commercial uses make proper provision for solid waste storage and disposal? Of course.
- (1) All applications for CUPs for commercial uses shall show how any solid waste generated will be properly stored and disposed of. The Planning Commission may reject an application for a CUP for a commercial use upon finding that the proposed provisions for solid waste storage and disposal are inadequate.
 - (2) Effective buffering or screening of solid waste receptacles is encouraged.
- (3) No use shall serve food primarily in disposable containers, except when such containers are required for take-out service during a public health emergency.
 - (P) Can commercial uses have signs? Yes, but only in compliance with the requirements of §§153.185 et seq.
- (Q) Can the operating hours of home businesses be restricted? Yes. The Planning Commission may condition approval of a commercial use on limited operating hours.
- (R) Are drive-throughs or drive-ins allowed? No. Drive-through windows and facilities for drive-in service are prohibited in Boulder. This standard does not prohibit curbside service for people with mobility limitations or during a public health emergency.
- (S) Are standardized commercial uses allowed? No. Commercial enterprises that are required to use standardized features including architecture, décor, menus, signs, and/or uniforms by contractual, franchise, or other agreements are prohibited.
 - (T) Can commercial uses include accessory dwellings? Yes.
 - (1) Accessory dwellings for the owner and/or employees are permitted as part of a commercial use.
 - (2) Provision of affordable housing for employees as part of a commercial development is encouraged.
- (U) Does the Town encourage new or substantially rebuilt commercial buildings to comply with certain design standards? Yes. Compliance with these standards will be determined by the Planning Commission using the scoring range and weight adopted on the commercial use checklist.

- (1) Reflectivity: The use of highly reflective building materials, including large expanses of metal and/or glass is discouraged. This standard is not intended to prohibit or discourage the use of solar power.
- (2) Color: New or substantially rebuilt commercial buildings are encouraged to use earth tones for the bulk of their facade. Bright accents in the form of trim, doors, or possibly other architectural details are not discouraged.
- (3) Building Lines: Long, uniform building lines are discouraged. There are numerous ways to comply with this standard, depending on the scale and use of the building, including varying the pitch of the roofline, varying the building footprint, placement of windows and doors, and adding architectural details, potentially including changes in color or the texture of the siding.
- (4) Detached Forms: The use of detached forms a cluster of smaller buildings rather than one larger structure is encouraged for lodging and commercial development that will have multiple tenants.
- (V) Are any commercial uses specifically encouraged because of their contribution to the local economy? Yes. Commercial uses that process and sell primarily local agricultural products and/or primarily the creations of local artists or artisans are encouraged.
- (W) Does the Town regulate telecommunications facilities? Yes, but not using the provisions of this chapter. Please see Ordinance 2020-3.
- (X) Does Boulder have additional standards for campgrounds, including RV parks? Yes. Campgrounds, including RV parks, must comply with the standards of § 153.430.
- (Y) Is Water-Wise Landscaping Encouraged? Water-wise landscaping is encouraged. No landscaping encouraged by this ordinance shall receive a positive score (it may receive a zero) if water-wise techniques are not used.
 - (Z) Does Boulder have additional standards for guest ranches? Yes.
 - (1) The minimum required acreage for a guest ranch is 55 acres.
- (2) The lodge, bunk houses, or cabins cumulatively shall include not less than four nor more than tem overnight guest rooms. Kitchens, dining areas, rest rooms, storage, and other shared indoor facilities do not count as guest rooms.
- (3) The Planning Commission may require deeper setbacks for guest ranches than those required by the Table of Development Standards where it finds that the additional depth is needed to mitigate potential conflict with adjoining uses.
- (AA) How will compliance with these standards be ensured? A certificate of occupancy is required for all commercial developments. No such certificate shall be issued until all improvements, including, but not limited to, landscaping, screening, parking areas, off-site traffic mitigation, required for compliance with any of the standards adopted here are in place. A CUP is subject to revocation, as provided in §§ 153.150 et seq.

The Planning Commission may reduce the requirement for side and rear setbacks to as little as 20 feet where there is existing or proposed vegetation or a break in

terrain that effectively screens the campground from neighboring properties.

- (B) Is there a limit on the number of units that may be in a campground?Yes. There may be no more than 30 units, including RV sites, tents, and cabins. One unit reserved for the use of the owner or an employee does not count toward the 20
- (C) How many campsites may be developed per acre? The maximum number of campsites, including RV sites, tents, and cabins, per acre shall be ten.

 - (1) The minimum width of a campground access drive shall be 24 feet unless otherwise specified by UDOT.
- (2) The depth of a campground access drive (distance from highway to first intersecting road or parking) must be at least 60 feet unless UDOT requires more depth.
 - (3) Turning radii of campground access drives must be suitable for motor homes and large trailers.
 - (E) Are there standards for safe circulation and parking within a campground?Yes.

 - (F) What improvements are required in a campground?
- (1) RV Pads. Each RV pad shall have water, sewer, and power connections. RV pads may also have a fire ring or grill on a nonflammable surface. Fires shall be confined to that area. There shall be an approved garbage container within 300 feet of each RV pad.
- (2) Tent Sites. Each tent site shall have access to potable water within 300 feet and a safe outdoor cooking area, developed with a fire ring or grill on a nonflammable surface. Fires shall be confined to that area. There shall be an approved garbage container within 300 feet of each tent site.
- (3) Water and Sewerage Systems. Water and sewerage systems shall be designed, installed, and maintained in compliance with state law. Fire hydrants may be required by the fire code.
- (4) Restrooms and Showers. Public restrooms, including toilets, sinks and showers, shall be provided in compliance with Utah law, specifically Utah Health Rules R392-301 or their successor.
- (5) Park Office. Each campground shall provide a permanent or portable office structure. This structure may include restrooms and showers, as required by division (4), above. It may also incorporate a dwelling unit for the owner or employees. A separate dwelling unit may also be permitted.
 - (G) Are there requirements for the continuing operation of campgrounds?Yes.
- (1) Every campground shall have an attendant or host. A landline and phone number at which the attendant or host may be reached shall be prominently posted on the exterior of the office and in each separate restroom or shower building.
 - (2) All fuel dispensing equipment and its use shall comply with the currently applicable fire code.
 - (3) Wheels and axles shall not be removed from vehicles in the park except for emergency or temporary repair.
 - (4) Since power connections are required, the operation of generators is prohibited.
- (5) Garbage containers shall be resistant against animals, tipping, and wind, including the provision of fenced enclosures if required by the Planning Commission. No garbage container may be placed within a required setback.
- (6) There shall be regular solid waste removal. The Planning Commission may require submission of a solid waste service contract as a condition of continuing compliance with the CUP.
- (G) Is there a limit on the duration of stay in campgrounds? Yes. Occupancy shall be limited to no more than 180 days in any 365-day period. A single campground host may be exempt from this limit.
- (H) Is continuing maintenance required? Yes. Continuing maintenance of all campground improvements, including landscaping, is a condition of CUP approval. Failure to maintain the campground as approved may result in revocation of the

CUP.
